## PAPA Hanging Height Restriction

**3 different types**  
are available in the  
range

Hangig height restriction to mark the drive-through height at gates. Restrictor must be produced in nontoxic polymer (PE) pipe in Ø140mm. The mounting rope must be a steel wire 4mm with 2 wire rope grips. For safety reasons the primary colour must be Yellow RAL1018. Chemical resistance must be High according to ISO/TR 10358. The traffic barrier must be operational within the temperature range of -40° to +50° Celsius. Restrictor must be delivered pre-assembled to reduce installation time limited to drill 2 holes. The restrictor must have a minimum warranty of 5 years.
